- 5 次の英文は、カレン（Karen）が書いたものです。これを読んで、あとの（１）～（３）に答えなさい。＊印の語句には、本文のあとに（注）があります。（25点）

My mother is a *nurse. She always takes care of me when I am sick. Last month I had a cold and I felt really bad, so my mother took the day off work and stayed with me. She gave me medicine and said, “Karen, you must rest a lot, and drink a lot of water.”

“Why do people get colds?” I asked her, and she told me that there are many kinds of cold *viruses out there. You never know which one you will get, so there isn’t a *cure for each one. “When a virus *attacks your body, your body works hard to fight it,” she said. “You may feel bad, but your body is doing everything it can to kill the cold.”

When I was back at school a few days later I borrowed a book from the library. It was all about colds and *flus. The book said that different people around the world have different ways to help people who have colds. In the United States and some other countries, people eat *chicken soup to feel better. Some people take hot baths and warm drinks. Other people take medicines they get in the *drugstore.

There was one interesting thing I saw in the book. Some scientists say that you should not take medicines when you have a cold. Bodies can do a great job on their own, they just need time.

Another interesting thing I read about is this: “It takes about one week to *get over a cold if you don’t take medicine,” the book said, “but only seven days to get over a cold if you take it.”
